

**Xtreme 2.0**, a **20mm-thick porcelain tile** collection perfect for all kinds of outdoor settings. The manufacturing process includes the selection of raw materials (white clays, quartz, feldspar, kaolin etc.), pressing at a pressure of 4,600 metric tons (400 kg/cm<sup>2</sup>), firing at a temperature of over 1,180° C for 100 minutes, and rectifying the tiles. The outcome are tiles of outstanding characteristics; installation is possible using differing outdoor tile-laying systems.

- Low Absorption; Xtreme 2.0's water absorption rate of < 0.1 % guarantees resistance to frost, ice and temperature changes.
- Resistance to Stains; Xtreme 2.0 is resistant to stains and its colors are unaffected by sunlight.
- Resistance to Chemicals; Xtreme 2.0 is resistant to swimming pool salts, acids and chemical substances.
- Strength; Thanks to its high breaking strength ( $\geq 13,100$  N), optimum performance is guaranteed in public areas, homes, and places subject to high traffic.
- Installation; The tiles can be laid using a variety of different systems, avoiding the problem of drying times and rubble removal.
- Removal; The tiles can be laid and later removed for re-use in another place or to gain access to drains and/or perform maintenance work.
- Cleaning; Because they are low on maintenance and easy to clean, they are perfect for outdoor use.
- Slip Resistance; Xtreme 2.0 collection meet or surpass class 3, R12, group C and DCOF > 0,60 ratings.

### Installation Options

Given the resistance and durability of 20mm-thick porcelain tiles, they can be laid in numerous different ways. They are perfect for bonding on to all kinds of surfaces, including driveways and parking areas. Likewise, they can be laid on top of pedestals, gravel or lawns.
